

Workshop
On

Advances in **CARTILAGE AND BONE REPAIR**

Date: Wednesday, 2nd Feb 2011

Venue: Deccan Rendezvous

Timings: 8.30 pm onwards

Dear Colleagues,

It gives us immense pleasure to invite you to Poona Orthopaedic Society Workshop on Advances in Cartilage and Bone repair.

Management of chondral damage to the knee and regeneration of bone tissue have remained a challenge to orthopedic surgeons even today. Chondral damage to the knee is common and if left untreated can proceed to degenerative osteoarthritis.

Autologous Chondrocyte Implantation is used for full thickness chondral or osteochondral injuries which are painful and debilitating with the aim of replacing damaged cartilage with hyaline or hyaline like cartilage, leading to improved function.

CHONDRON[®] is the patient's own (autologous) cartilage cells expanded through cell cultivation process for transplantation into the cartilage defect sites.

OSSRON[®] is the first cell therapy treatment in the world for the regeneration of bone tissue. This treatment is based on an autograft. Stromal cells from bone marrow of the patient are cultured and differentiated into osteoblasts (cell precursors of bone) *in vitro*.

This meet would feature more of practical & technical aspects. We propose to make this an exciting and interesting event with your esteem presence.

Dr. Parag Sancheti

Chairman

Consultant Orthopaedic Surgeon

Sancheti Institute for Orthopaedics and
Rehabilitation, Pune.

Events

- Visual Presentation** : Autologous Chondrocyte Implantation (ACI) in management of Chondral defects.
&
Autologous Bone Implantation (ABI) in management of Bone defects: **Dr. S. J. Kim.**
- Introduction Speech** : RMS Regrow® Introduction
- Registration** : There is no registration fee for participation. However Registration via phone is compulsory. Kindly Call or SMS:
Dr. Archana Chavan +91 9930 43 48 33
& confirm your participation.
All delegates will be presented a certificate of attendance.
- Venue** : *Deccan Rendezvous*, 1202/3 Apte Road, Shivaji Nagar, Pune 411004.

Followed by Cocktail & Dinner

International Faculty

Dr. Seok Jung Kim

Director – Cell Therapy Centre,
Uijongbu St. Mary's Hospital,
The Catholic University of Korea. Seoul.
Pioneer in the use of Advanced Cell Therapy
(International Einstein Awardee for
Scientific Achievement)

Academic Program supported by

Regrow®

House No: 1170/23/1, Samarth Prasad, Revenue Colony, Shivajinagar, Pune, 411005.
