CARTIGROW®

Cartilage Cell Therapy

CARTIGROW® is a biological product consisting of patients' own (autologous) Cartilage-forming Cells called "Chondrocytes". These Chondrocytes have the capacity to form new Hyaline Cartilage.

CARTIGROW® is India's first clinically approved Cell Therapy product to treat Articular Cartilage Defects.

How does CARTIGROW® Work?

Cartilage Cell Therapy consists of three steps:

STEP
01

Extraction of a tiny piece of healthy Cartilage Tissue via Keyhole procedure

STEP
02

Cartilage Cell Culture at a GMP Grade laboratory

STEP
03

Implantation of the final product in the patient's Knee Joint

Is CARTIGROW® Safe?

- CARTIGROW® is a completely safe and natural treatment as it involves patients' own cells.
- Patients have not experienced any safety-related adverse events related to the product during clinical trials.
- CARTIGROW® is approved and licensed for commercial use by CDSCO (DCGI), Ministry of Health and Family Welfare, Govt. of India.

How Effective is CARTIGROW®?

Patients have reported:

**Ability to restart sports
within 4-6 months**

**More than 80% pain
reduction within
3 months**

**More than 5X
improvement in
physical activities**

Patient benefits:

Regeneration of healthy Articular Cartilage helps to resume an active lifestyle including sports & athletics

Preservation of the joint gives relief from symptoms like swelling and joint stiffness

Biological Therapy helps eliminate the need for other highly Invasive Knee Surgeries

Why **CARTIGROW**®?

Doctors have reported successful long-term clinical results of **CARTIGROW**® in India.
