OSSGROW

PRECAUTIONS BEFORE IMPLANTATION

Step wise instructions to be followed:

Just before implantation, place the Delivery Kit on non sterile trolley. Remove the Outer Vial(s) and place it on the same trolley.

Take out the outer surface of the Inner Class Vial(s) and with the help of sterile gauze piece. Wipe the Inner Class Vial(s) containing final product on sterile trolley.

If media of inner vial is cloudy or showing any foreign particles, do not use the vial, instead use new vial.

Do not use the vial if there is visible change of color of solution from red to yellow or brown.

If the product is insufficient or not upto the quality standards enlisted on the COA, please initiate recall of the Delivery Kit.
