

# Ossgrow® Bone Cell Therapy

Ossgrow® is a biological product consisting of Bone Forming Cells called Osteoblasts. Ossgrow® is prepared from the patient's own cells (Autologous) which have the capacity to form new bone.

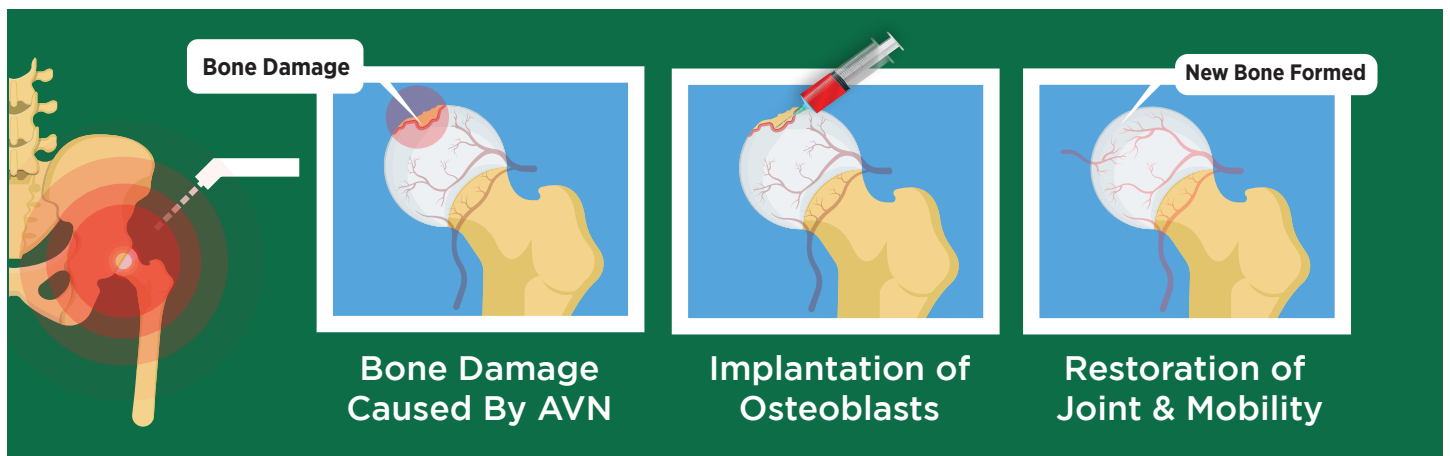

Ossgrow® is the world's first clinically approved product to treat Avascular Necrosis (AVN).

## How does the treatment work?

Ossgrow® Bone Cell Therapy is a one-time minimally invasive treatment provided by internationally trained Orthopedic Surgeons.
